EDUCATION

GITAM Deemed to be University – Bengaluru Campus

B. Tech. in Computer Science

Bengaluru

Nov 2022 – June 2026

EXPERIENCE

Software Engineer Intern

Jan 2026 – Jul 2026

Albert Invent

Bengaluru

- Published [@yaseen-agma/testmu](#), an open-source npm CLI adopted by the Automation team, pulling test cases from TestMU into coding agents (Claude Code, Codex) across Linux, macOS, and Windows
- Orchestrated Claude Code agents into an automation pipeline using the testmu CLI and custom lifecycle hooks, producing 194+ automated test cases (~26% of the project's suite)
- Built a Power Automate system that traces git blame on CircleCI failures to notify developers in Teams instantly, replacing manual failure tracking

Full Stack Developer

June 2025 – Dec 2025

Palette Design Pvt Ltd.

Bengaluru

- Owned full-stack development of a multi-tenant AI design platform: led its TypeScript migration and frontend rewrite (React, Tailwind, React Flow), and built the FastAPI backend with RBAC, MongoDB schema design, S3 uploads, and Inngest jobs
- Architected an AI generation pipeline (FastAPI, n8n, GPT-4o/Gemini) streaming multi-screen UI generations to the frontend in real time via SSE
- Owned deployment end-to-end, containerizing builds to Render via Docker and cutting infrastructure costs by migrating DynamoDB to MongoDB

Algorithm Developer

May 2025 – July 2025

PathVision Technologies Pvt Ltd.

Bengaluru

- Optimized a realtime video processing pipeline for pothole detection pipeline (YOLOv3, Raspberry Pi 5) for IDAS, boosting throughput by ~8 FPS via multithreading, frame skipping, and an FFmpeg based video pipeline
- Improved visual detection accuracy from 85% to 93% by replacing a custom CNN with YOLOv3 for real-time embedded video analysis

PROJECTS

Palette Design | React, TypeScript, FastAPI, n8n, SSE | [Live] [Demo]

March 2025 – Dec 2025

- Built an end-to-end AI product design platform converting prompts into structured UX flows and production UI screens via Gemini/GPT-4o orchestration
- Led the frontend architecture in React/TypeScript with React Flow for UX mapping and real-time UX–UI sync, and built FastAPI/n8n/SSE pipelines for streaming, context-aware generation

Swasth Dekhbhal | React, TypeScript, FastAPI, PostgreSQL, MongoDB, XGBoost | [Live]

Dec 2025 – Feb 2026

- Designed a hybrid PostgreSQL + MongoDB data model for patient records, clinical cases, reports, and audit trails
- Built an agentic FastAPI backend (Gemini 2.5 Flash, tool calling) integrating an XGBoost diabetes model (92% accuracy) with role-based dashboards and S3 uploads

Lawyour | [Live] | Next.js, React, Tailwind CSS

Jun 2026 – Jul 2026

- Built a legal-tech platform connecting defendants with lawyers across India, owning UI/design and frontend development on Next.js and React
- Converted mobile-first designs into a desktop-native UI, iterating with AI-assisted design tools to establish a distinct, non-template visual identity

TECHNICAL SKILLS

Languages: C, C++, Python, TypeScript, JavaScript

Frontend: React, Next.js, Redux, Zustand, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, Socket.io, SSE, WebSockets, Inngest

AI & Computer Vision: Claude Code, OpenCV, FFmpeg, Codex

Databases: MongoDB, PostgreSQL, DynamoDB

Cloud & DevOps: Docker, Amazon S3, GCP, Render, CircleCI, Linux, Ubuntu, Bash

UI / UX: Figma, Wix Studio, Framer, FigJam

Tools: Git, GitHub, Jira, Linear, n8n, Flowise

CERTIFICATIONS & ACHIEVEMENTS

- Open Source Contributor, Microsoft VS Code** – merged a pull request into the VS Code codebase
- CircleCI Associate Developer Certificate** – CI/CD pipeline configuration and workflow automation
- Google Cloud Skills Boost** – Generative AI, Large Language Models, and Cloud Computing Foundations certificates
- Smart India Hackathon (SIH) 2026, Round 2 Finalist** – national-level innovation competition by the Ministry of Education
